

I'd like to voice my concerns regarding the "business relationship" clause being introduced in this petition. Being a marketer, I can fully appreciate the need to reach consumers with new products and services and the luxury the personalized telephone conversation can bring with this type of access. But, being a consumer, I'm simply too accessible from other methods such as e-mail, snail mail, advertising, etc. Are we at the point where nothing is sacred or private for the consumer? I don't want telephone calls in the middle of the day, in the middle of my dinner, when I'm settling down for the evening, etc. This petition weakens this one, solitary benefit. Please consider this.
